

ANNAMARIE BONDI-STODDARD, ESQ.
Pegalis & Erickson, LLC

As the managing attorney at Pegalis & Erickson, LLC, a leading medical malpractice/personal injury law firm located in Lake Success, Annamarie Bondi-Stoddard is one of a handful of women in the country to have risen to that position. She has an encyclopedic knowledge of medical topics including birth injuries, cardiac matters, cancer care and surgical and neurosurgical matters that is necessary to fully and properly represent her clients in a variety of medically related cases. The firm she leads has won the two highest medical malpractice verdicts ever rendered in the State of New York as reported by the New York Jury Verdict Reporter – \$116 million in 1998 and \$114.8 million in 2001.

She has captained a team of attorneys-cum-medical experts into an increasingly impressive array of courtroom victories and her devotion to her specialty and the legal skill of her firm have established Pegalis & Erickson as a genuine resource for Long Islanders from all walks of life. The firm has been at the forefront of setting fair compensation levels to victims of improper medical care and has a well-earned reputation as one of the region's leading victim's advocates.

Bondi-Stoddard was graduated from Seton Hall University summa cum laude in 1980 before earning her J.D. from Boston University in 1983. The Port Washington resident joined Pegalis & Erickson in 1984 and became managing attorney in 1986 and managing partner in 2001.

Bondi-Stoddard's devotion to her professional causes does not diminish outside the office. Nor does that of the other Pegalis and Erickson attorneys. Among them, they have been actively involved in many Long Island health initiatives including the Babylon Breast Cancer Coalition; the HeartShare Human Services Dinner; Angela's House, a respite home for handicapped kids in Suffolk County; the Kick for the Cause soccer tournament for breast cancer research; Ovarian Cancer Research; the Leukemia and Lymphoma Society; the Stanley Lamm Institute, where the firm's donation made possible a cutting edge computer that analyzes the gait of children with Cerebral Palsy; the Long Island Women's Agenda; United Cerebral Palsy Auxiliary, Wantagh Chapter; and the Breast Cancer Awareness program to reach the Island's Hispanic Community.
